THE Southwestern Stockman appears in a new and attractive form, which will, we think, take well with its nu merous patrons. The Stockman always was a good paper. We compliment it on its improvements and wish it abundant success.

PRICES and wages both continue to decline. Such is the statement of R. G. Dunn & Co., and their sources of information and opportunities of observation are such as to leave no ground for questioning the assertion. Is this the change the people voted for?

Wirm prime cattle worth less than \$10 per bead in Australia and mest upon the free list, it is quite possible that we may become an importer of colonial American farms, January 1, 1894, was \$14.66, and even if the Canadian farmers are unable to depreciate the value of our cattle, their Australian cousins may be in a position to do so shortly.

It is worthy of comment to note how gracefully the Star and CITIZEN fell into sympathy with the settlers after they had come out victorious in the land grant cases. The people, however, real ize that The Enterprise has ever been their champion throughout all their struggles.-Enterprise.

THE democratic party of Arizona fast closing up its ranks. A few of the would-be bosses are being retired, but this comes only as matter of course. A few more retirements and the old party will be as invincible as of yore.

The editor of the Gazette when he penned the foregoing was not looking out of the administration window. The democratic party is as hoplessly split as s double star seen through Prof. Douglass' six inch telescope. The repellant influences now at work between the two factions is daily gathering force and the only possibility of their ever coming together would be in their efforts to "do each other up." May the present harmony in the party last long.

MR. Fear of Hydrophocia.

Another case of supposed hydrophobia is recorded. Jam s F. Gerald was constrained to kill a yearling steer which showed marked sympoms of the disease. This is the second animal that he felt obliged to kill, and perhaps there are others in the numerous berds of that vizinity which, sconer or later, may develop the latent mala-dy. The greatest tear, however, is that it may become ep demic in mengrel pupples, whelps and hounds, and worthless curs, household pets which through mistaken affection are allowed to occupy the chimney corner, or ramble chainless at will without fear of consequences. ever.
